## Brookwood - Tract 8226

## Comparison with a Typical Single-Family Residential Development Standards

 Bold text indicate where exceptions to the standards are being requested. Single-Family Residential Development Standards are based on 50 feet x 100 feet, 5000 square foot typical Single-Family lot.
## Lot Size

| Single-Family Residential Development Standards | 5000 square feet minimum |
| :--- | :--- |
| Plan 1 | $\mathbf{3 , 1 2 2}$ square feet |
| (excludes lot $\mathbf{9 , 1 0} \& \mathbf{1 8}$ which are $\mathbf{3 , 1 7 3 , 3 , 8 4 1 ~ \& ~}$ |  |
| $\mathbf{3 , 3 8 4}$ square feet respectively) |  |
| Plan 2 | $\mathbf{3 6 0 2}$ square feet |
| (excludes lot $\mathbf{1 1}$ which is 4,051 square feet) |  |

## Front Yard Setbacks

Though all homes did not meet the Building and Porch Front Yard Setbacks, the 20-foot garage setback allows two cars to be parked on the driveway. The lessor building front yard setbacks has a lessor impact on privacy with the street providing separation of the homes from the homes across the street.

|  | Building | Porch | Garage |
| :--- | :--- | :--- | :--- |
| Single-Family <br> Residential <br> Development Stds* | 20 feet min. $-1^{\text {st }}$ floor <br> 20 feet min. $-2^{\text {nd }}$ floor | 15 feet minimum | 20 feet minimum |
| Plan 1 | 20 feet $-1^{\text {st }}$ floor <br> $\mathbf{1 8}$ feet $\mathbf{1 0}$ inches $-\mathbf{2}^{\text {nd }}$ <br> floor | $\mathbf{1 1}$ feet 6 inches | 20 feet |
| Plan 2 | 9 feet $\mathbf{8}$ inches $\mathbf{- 1}^{\text {st }}$ <br> Floor <br> $\mathbf{1 8}$ feet $\mathbf{6 i n c h e s ~}-\mathbf{2}^{\text {nd }}$ <br> Floor 14 feet | 20 feet |  |

## Side Yard Setbacks

| Single-Family Residential Development <br> Standards* | 5 feet minimum |
| :--- | :--- |
| Plan 1 | 5 feet |
| Plan 2 | 5 feet |

## Side Street Yard Setbacks

| Single-Family Residential Development <br> Standards* | 10 feet minimum |
| :--- | :--- |
| Plan 1 (Lot 18) | 10 feet |

## Rear Yard Setbacks

All nine Plan 2 homes meet the Rear Yard Setback and though Plan 1 homes did not meet the minimum rear yard setbacks, the 1st and 2nd floor where set back far enough to provided privacy for the homeowners.

|  | $1^{\text {st }}$ Floor | $2^{\text {nd }}$ Floor |
| :--- | :--- | :--- |
| Single-Family Residential <br> Development Standards | 20 feet minimum <br> Additions -10 feet minimum* | 20 feet minimum |
| Plan 1 | $\mathbf{1 7}$ feet | $\mathbf{1 5}$ Feet |
|  | 10 feet * | 20 feet |
| Plan 2 | 20 feet |  |
|  | 15 feet $*$ |  |

* When adding a 1st floor rear yard addition, the rear yard setback can be reduced to 10 feet minimum but the portion in the required rear yard can't exceed $20 \%$ of the required rear yard. For comparison purposes, the setback closest to the rear property line was treated as if it was the $1^{\text {st }}$ floor addition.

## Maximum Lot Coverage

Only 2 of the 18 proposed homes met the $40 \%$ maximum lot coverage. Those that exceeded ranged from $42.5 \%$ to $46.2 \%$.

| Single-Family Residential Development Standards | $40 \%$ maximum |
| :--- | :--- |
| Plan 1 (excludes Lot $\mathbf{9}-\mathbf{4 5 . 4 \%}$, Lot $10-37.5 \%$ \& | $\mathbf{4 6 . 2 \%}$ |
| Lot 18-42.6\% |  |
| Plan 2 (excludes Lot 11-39.8\%) | $\mathbf{4 4 . 8 \%}$ |

## Required Rear Yard (Private Open Space)

Ten of the 18 proposed homes met or exceeded the Required Rear Yard requirements. Though only one Plan 1 home met the Required Rear Yard requirement, all the Plan 1 homes included a large 162 square foot front porch.

| Single-Family Residential Development Standards | 800 square feet $* *$ |
| :--- | :--- |
| Plan $\mathbf{1}$ (exceptions: Lot $\mathbf{9} \mathbf{- 5 6 6}$ sf ,Lot $10-972$ sf \& | $\mathbf{5 5 4 . 5}$ square feet (+ $\mathbf{1 6 2}$ sf porch = 716.5) |
| Lot $\mathbf{1 8} \mathbf{- 6 4 0}$ sf) |  |
| Plan 2 (exception: Lot 11-890 sf) | 815 square feet |

** The Required Rear Yard is the Width of the Lot (50 feet) times the Rear Yard Setback ( 20 feet) which in this case equals to 1000 square feet. The Single Family Development Standards allows the Required Rear Yard to be reduced by 20 percent when a first floor addition is added to the house which brings the Required Rear Yard down to 800 square feet.
