**So Hay**

**Affordable Housing Plan**

The development of this new community will be a catalyst project for the City of Hayward. SoHay is not just a project but the creation of a new South Hayward District. SoHay proposes three distinct neighborhoods all tied together with a highly amenitized and visually appealing path system and centralized public space. Each neighborhood has a variety of views, spaces, and access points – avoiding the monochromatic experience of master plans of the past.

There is an opportunity to provide both “for rent” and “for sale” affordable housing units within the SoHay community. Twenty rental units would be available to those who qualify as a “Low Income Household” as defined in the City’s Affordable Housing Ordinance. The 20 available units would consist of a variety plan types spread throughout the two apartment buildings.

Twenty-eight “for sale” units would be spread throughout PA2, the largest of the three neighborhoods within SoHay and would be available to those who qualify as a “Moderate Income Household” as defined in the City’s Affordable Housing Ordinance. Each of the 28 units would be a “Plan One” which is a single story ground level unit comprised of 1 bedroom, 1 bathroom and a single car garage. Twenty-two of the “Plan One” units will be sold at market rate. The 28 affordable condominium units will be spread throughout each sub-area of PA2. This results in over 10% of the overall units in SoHay being available as affordable housing units. The exact terms of the program would be memorialized through the execution of an Affordable Housing Agreement.
