"P" designates permitted uses.

"A" designates uses that are permitted after review and approval of an Administrative Use Permit.

"C" designates uses that are permitted after review and approval of a Conditional Use Permit.

"-" designates uses that are not allowed.

A project which includes two or more categories of land use in the same building or on the same site is subject to the highest permit level required for any individual use or single component of the project.

Section numbers in the right-hand column refer to other sections of the Zoning Ordinance, other limitations, and applicable subsections following the Table.

Land uses are defined in Article 1, Section 10-1.3500, Definitions. In cases where a specific land use or activity is not defined, the Planning Director or other approving authority shall assign the land use or activity to a classification that is substantially similar in character. Land uses defined in the Hayward Municipal Code and not listed in the Table or not found to be substantially similar to the uses below are prohibited.  - (d) Duration of Limit: Once a permit is granted establishing the maximum number of animals allowed on a property, the permittee is entitled to maintain that maximum number of animals indefinitely as long as an animal(s) has existed continuously, in that six months have not passed where there were no animals on the property.
 - (3) Minimum Available Open Area. All livestock or other animals shall be provided with the minimum available open area specified below (such area may include barns, stables, sheds or similar structures used to house animals):
 - (a) For large livestock, the minimum available open area per animal shall be 5,000 square feet;
 - (b) For medium livestock, the minimum available open area per animal shall be 2,500 square feet;
 - (c) For poultry, the minimum available open area per animal shall be 36 square feet;
 - (d) For exotic animals, the minimum available open area per animal shall be as determined by the Planning Director, based on the species of the animal.
 - (4) Buildings and Structures. All animals shall be provided with adequate shelter or other protection from the elements. Shelter may be provided through the construction of a coop, stable, or other structure, as appropriate for the species of animal and as determined by the Planning Director. Buildings and structures used for the housing of animals shall be located behind the principal

structure on the lot. Such buildings and structures may be located elsewhere on the lot due to topography or other special characteristics of the lot, subject to approval of the Planning Director. Such structures shall be large enough and designed such that all animals may lie down, stand up, fully extend their limbs and turn around freely, as required by the section 1350 of Title 3 of the California Code of Regulations, as may be amended from time to time. Hives and accessory structures for the keeping of livestock or household pets shall not be located in front of a primary structure.

- (5) **Maximum Height of Structures.** No building or structure used for the housing of animals shall be erected or maintained on any lot to a height greater than that permitted for accessory structures in the respective zoning district. For small livestock and household pets, the maximum height of an enclosure shall be six feet, except for beehives. For beehives, the maximum height shall be limited to four feet. A greater height may be permitted based on consideration of special characteristics of the lot, including, but not limited to, topography, lot size, and building placement, and subject to approval of the Planning Director.
- (6) **Minimum Setback Requirements.** All barns, stables, and other structures used for the housing of animals, except for household pets, on any lot shall be located not less than 20 feet from any property line and not less than 40 feet from any dwelling on the same or adjoining lot. Beehives and all structures for the housing of household pets, including chicken coops, shall be located not less than 5 feet from any property line and not less than 6 feet from any dwelling on the same or adjoining lot. The distances as specified in this subsection may be reduced or waived upon the finding that such distances are not necessary for the protection of nearby residences.
- (7) **Fence Requirements.** All areas containing livestock or other animals shall be enclosed by fences which are good, strong, substantial, and sufficient to prevent the ingress and egress of livestock or other animals. Such fences shall be designed and constructed of appropriate materials and be of an adequate height so as to control and contain such animals at all times, while avoiding injury to such animals, preventing such animals from reaching across any property lines, and of a design that does not detract from the appearance of the site or surrounding area. Where bees are proposed to be kept, a solid fence of at least six feet in height shall be erected along all property lines within ten feet of the hive. Hives shall not be located in areas where this requirement cannot be met due to height limitations for fences.
- (8) **Maintenance of Livestock and Other Animals.** All livestock and other animals shall be kept or maintained so as to minimize and prevent production of flies, excessive odor, dust, noise, or other conditions detrimental to the community health and welfare, by applying the following minimum requirements:
 - (a) Manure must be removed daily from the corral, stable, paddock, or other holding areas and stored in fly-tight containers, cans or holding boxes, until disposal; roosts, lofts, and rabbit hutches must be cleaned daily unless worm beds are maintained under the rabbit hutches. Composting or similar treatments may be permissible if performed to appropriate standards so as not to constitute a nuisance, as determined by Planning Director.
 - (b) Watering troughs must be so constructed and located that they do not overflow excessively in the stall, corral or paddock area, as to promote mosquito larvae growth.
 - (c) Hay must be stored in such a manner so as not to become a nesting place for rodents, i.e., stored in rodent-proof buildings or off the floor and away from walls, other material or equipment.
 - (d) Grain feeds shall be stored in rodent-proof containers or buildings, i.e., metal cans or rodent-proof feed cribs; all other feed must be stored in vermin-proof containers.

-
- (e) The entire area set aside for the animals shall be cleared of all rubbish and debris.
 - (f) Livestock shall not be abandoned on any property or right-of-way in the City of Hayward. Any application for a permit to keep livestock shall include a preliminary plan for the eventual discontinuation of the keeping of livestock on the site, including a method for the relocation of livestock.
 - (g) Where apiaries are proposed to be sited within one hundred feet of any residence, a person responsible for management of the hives must reside on the property.
- (9) Livestock as a Legal, Nonconforming Use. Livestock existing as a legal, nonconforming use may continue indefinitely as long as (1) the livestock have existed continuously in that six months have not passed when there were no livestock on the site, (2) the maximum number of livestock established as a nonconforming use is not increased, and (3) as long as there is no intensification of livestock, e.g., legal, nonconforming medium livestock may not be intensified by replacing them with large livestock. The burden of proof for establishing the legal, nonconforming status of livestock rests with the property owner subject to the endorsement of the Planning Director.
- (10) Permit Required. As provided in the Zoning Ordinance, a Zoning Conformance Permit is required prior to the establishment of household pets or apiaries as a secondary use. This requirement shall be waived for household pets where the enclosure is located at least forty feet from any residence, and for apiaries where the hives are located at least one hundred feet from any residence. An application for a Zoning Conformance Permit shall be reviewed by the Planning Director or their designee and shall be approved if all of the standards of this section are met.
- (a) Household Pets: A Zoning Conformance Permit is required for the establishment of the following household pets: Hens, ducks, pigeons, rabbits and other similar small animals, as determined by the Planning Director, where the proposed total number on a property does not exceed four (4) of such animals. An application for a Zoning Conformance Permit shall be submitted on a self-certification form, wherein an applicant shall acknowledge with their signature or initials that they understand the requirements of the Hayward Municipal Code with respect to the maintenance and management of the animals that are proposed. Where the City determines that compliance with such standards is impossible given the characteristics of the site where the animals are kept, then the permit shall be deemed null and void.
 - (b) Apiaries: An application for a Zoning Conformance Permit for beekeeping shall require noticing of all property owners within one hundred feet of the property where the bees are proposed to be kept. Such notice shall be mailed within five business days of receipt of such application. If the City receives notification and documentation acceptable to the Planning Director (such as a doctor's note) that an individual who is allergic to bees resides within one hundred feet of the property where bees are proposed, the application shall be denied. Such notification and documentation may be received from any person who received an official notice from the City or from any person who can establish that they reside within one hundred feet of the property where bees are proposed to be kept. If no notification is received within thirty calendar days of the mailing of the official notice, and if the application meets all other city design criteria, the permit shall be issued.

Interior lot line fencing that does not front public right-of-way may be chain link.

-
- (e) Planned Development (PD) Districts: Fence standards for PD District properties shall be as approved in the PD District. If not specified in the PD District regulations, fence standards for vacant PD zoned properties shall be the same as those of the nearest adjacent zoning district as set forth in c and d above, and f below, as determined by the Planning Director or designee.
 - (f) Industrial and Other Districts: Chain link perimeter fencing may be placed around all sides of vacant properties, including those fronting public right-of-way. Such fences shall be consistent with the fence placement and height standards set forth in this subsection, unless otherwise permitted by the Planning Director or designee.
 - (g) Alternative fencing materials for all zoning districts may be approved by the Planning Director or designee upon finding that the proposed fence material is not chain link, is durable, well-designed, and enhances the aesthetic character of the City.
