

DATE: November 13, 2023

TO: Council Sustainability Committee

FROM: Director of Public Works
Director of Development Services

SUBJECT: Proposed General Plan Amendments: Climate Action Plan, Hazards Element, and Environmental Justice Element – Discussion and Recommendation to Council (ACT 23-099)

RECOMMENDATION

That the Council Sustainability Committee (CSC) accepts an amendment to ACT 23-099, regarding the proposed amendments to the General Plan including an updated Climate Action Plan, an updated Hazards Element, and a new Environmental Justice Element. Attachment II to the report inadvertently included accepted changes to the document. The version attached to this memo includes tracked changes to show the proposed changes to the existing General Plan implementation programs.

Prepared by: Makenna Colucci, Climate Action Fellow
Nicole Grucky, Senior Sustainability Specialist
Leigha Schmidt, Principal Planner
Erik Pearson, Environmental Services Manager

Recommended by: Alex Ameri, Director of Public Works
Sara Buizer, Development Services Director

Approved by:

Kelly McAdoo, City Manager

ATTACHMENTS

Attachment II Draft General Plan Implementation Programs – Track Changes

POLICY DOCUMENT: PART 4

GENERAL PLAN ADMINISTRATION AND IMPLEMENTATION

If the City's General Plan is to serve its purpose effectively, it must be reviewed, maintained, and implemented in a systematic and consistent manner. Implementation of the General Plan will occur through participation by a number of parties including residents, elected and appointed City officials, City staff, and City partners (e.g., HARD). Part 4 of the General Plan provides direction on how the City will implement and maintain the General Plan and sets out specific actions the City will undertake to achieve the goals and policies of the General Plan.

This Part begins with a summary of priority implementation programs for carrying out the General Plan, particularly those that need to be undertaken in the first three years (20014–2016). This is followed by an outline of the process for reviewing and updating the General Plan and a program for monitoring its implementation. It also outlines requirements for implementing the City's General Plan consistent with its goals, policies, standards, and programs, and provides an overview of the types of actions or tools the City will use to implement the Plan's policies. It concludes with tables that list specific implementation programs, organized by the topics addressed in the General Plan Elements.

Priority Implementation Programs

The General Plan contains a vision and set of goals and policies that are desirable for the community to achieve. Since everything cannot be accomplished immediately, the City has identified the following programs as highest priority for implementing the General Plan, particularly in the near term. These have been selected because they are likely to be most effective in transforming city operations and Hayward's community character consistent with the General Plan's Vision and Guiding Principles. However, the priority of specific actions or programs may change over time as community challenges, opportunities, and resources change. As the City implements programs on this priority list, the list will be adjusted to address new challenges facing the city.

- LU-1: Comprehensive Zoning Code Update
- LU-2: Comprehensive Subdivision Ordinance Update
- LU-15: State Historic Building Code
- M-1: Multimodal LOS and Design Standards
- M-2: Multimodal LOS Guidelines
- ED-9: Business Attraction , Expansion, and Retention Program
- ED-10: Town-Gown Partnership
- CS-2: Police Department Strategic Plan Annual Report
- CS-4: Homeless Services Partnership
- CS-9: Police and Fire Impact Fees
- CS-10: Disaster Awareness and Emergency Preparedness Program
- NR-8: Energy reduction Initiative and Annual Report
- NR-10: Financing Program for Residential Energy Efficiency Retrofits
- EDL-2: Education Partnership

- EDL-5: Public School Marketing Campaign
- EDL-7: Library Bond

Administering the General Plan

The General Plan will be implemented through policy decisions, ordinances and regulations, and future actions that are consistent with the General Plan. The General Plan is a dynamic document that should be revised to reflect changing circumstances and priorities in the City. The City is responsible for tracking, reporting and evaluating its progress in implementing the General Plan. State law provides direction on how cities can maintain the General Plan as a contemporary policy guide. It requires the City to report annually on “the status of the plan and progress in its implementation” (Government Code Section 65400[b]). The City must file annual progress reports on the implementation of the General Plan with the local legislative body, the Governor’s Office of Planning and Research (OPR), and the Department of Housing and Community Development (HCD).

General Plan Maintenance and Monitoring

The City is committed to annually reviewing its progress in implementing the goals and policies of the General Plan. Since many of the factors and issues that the General Plan addresses change from year-to-year, an annual review and reporting of implementation will help ensure the City is moving forward to achieve the Plan’s vision. This review will report on the status of each specific implementation program in the General Plan and take into account the availability of new implementation tools, changes in funding sources, and feedback from Plan monitoring activities.

General Plan Review and Update

At least once every five years, the City will thoroughly review the General Plan and revise and update it as necessary. This review and update process will focus on Policy Document goals, policies, and implementation programs. Minor updates to the Background Report may also be made in order to maintain internal consistency between existing conditions and General Plan policy.

General Plan Amendments

As conditions and needs change, the City will need to consider proposed amendments to the General Plan. State law limits general plan amendments to four per year, but each amendment can include multiple changes. Like the adoption of the General Plan itself, general plan amendments are subject to environmental review, public notice, and hearing requirements, and must not create inconsistencies with other parts of the plan. Some amendments will be policy changes, while many will likely be changes to the Land Use Diagram. Each of the changes will need to be carefully evaluated, not only for merit and potential impact, but also for consistency with the rest of the General Plan. State law requires that the general plan be an integrated and internally consistent set of goals, policies, standards, programs, and diagrams.

General Plan Consistency in Implementation

To ensure that the policies and proposals of the general plan are systematically implemented, State law requires that the actions and decisions of each local government concerning both its own projects and the private projects it approves are consistent with its adopted General Plan. The courts have supported and furthered this trend through their interpretations of State law.

The General Plan serves as a tool to align City decisions and actions with the community's vision. The General Plan will be implemented through municipal policy decisions, ordinances and regulations, and future actions that are consistent with the General Plan. This includes City Council priority setting and initiatives, budgeting and capital improvement planning, decisions on public and private development projects, and City activities and programs.

- Decision-makers will be responsible for ensuring that their decisions reflect the community's vision and are consistent with the goals and policies contained in the General Plan. They will ensure that sufficient resources are allocated to various departments to implement the General Plan. However, implementation of the General Plan is based on the availability of resources. Some goals, policies and implementation programs may not be achieved as identified if resources are limited or unavailable.

- City staff is responsible for ensuring that day-to-day operations and recommendations to decision-makers are consistent with the goals and policies contained in the General Plan. City staff recommendations to decision-makers should be prepared in consideration of General Plan consistency. Staff is also responsible for carrying out the implementation programs contained in the General Plan, and reporting on General Plan implementation.

Categories of Implementation Actions/Tools

The City will implement the goals and policies of the General Plan through many actions and tools that can be grouped according to the eight categories listed below. The two- to four-letter identifiers (italicized and in parentheses) are used in the General Plan to indicate how each policy will be implemented. The identifiers are also used in the Specific Implementation Programs to indicate the type of specific implementation program:

- Regulation and Development Review (RDR)
- City Master Plans, Strategies, and Programs (MPSP)
- Financing and Budgeting (FB)
- Planning Studies and Reports (PSR)
- City Services and Operations (CSO)
- Inter-governmental Coordination (IGC)
- Joint Partnerships with the Private Sector (JP)
- Public Information (PI)

Regulation and Development Review (RDR)

Many General Plan policies are implemented through regulations adopted by the City based on the city's police power to protect the public health, safety, and welfare. City ordinances also create a development review process that provides for City review of individual project proposals and authorizes the City to approve, condition, or deny projects based on their consistency with the

General Plan. The following is a list of regulatory procedures, plans, and ordinances commonly used to implement the General Plan:

- Master Plans
- Specific Plans
- Zoning Ordinance
- Subdivision Ordinance
- Building and other codes
- Habitat Conservation Plans
- California Environmental Quality Act (CEQA)
- Development Review

City Master Plans, Strategies, and Programs (MPSP)

The City has adopted many master plans, strategies, and programs focusing City attention on various types of city services and facilities, types of development, or geographic areas. These are prepared to provide more specific direction for city decision-makers, staff, and the public on how the General Plan will be implemented. They are not elements or components of the General Plan. The following is a partial list of master plans, strategies, and programs that the City has adopted or plans to adopt. Specific implementation programs in Part 4 of the General Plan call for the annual or periodic review of many of these master plans, strategies, and programs in addition to adoption of some new master plans and strategies:

- Downtown City Center Specific Plan
- South Hayward BART Form-Based Code
- Mission Boulevard Specific Plan
- Hesperian Boulevard College Corridor Plan
- Industrial Technology and Innovation Corridor Plan

- Mills Act Program
- Multimodal LOS and Design Standards
- Wayfinding Program
- Pedestrian Master Plan
- Bicycle Master Plan
- Economic Development Strategic Plan
- Industrial Technology and Innovation Corridor Marketing Strategy
- Business Attraction, Expansion, and Retention Program
- Town-Gown Economic Partnership
- Police Department Strategic Plan
- Homeless Services Partnership
- Fire Department Strategic Plan
- Disaster Awareness and Emergency Preparedness Program
- Energy Reduction Initiative
- Energy Efficiency Retrofits Financing Program
- Educational Resources for Hazardous Materials
- Cradle-to-Career Strategic Plan
- Public School Marketing Campaign
- Library Strategic Plan
- Capital Improvement Program

Financing and Budgeting (FB)

The development, maintenance, and operation of public facilities such as parks and drainage facilities and the provision of city services require financial resources that are derived from various

sources. Programming of City capital projects and their funding over time is outlined in the City's Capital Improvement Program, which is updated annually. The following is a list of revenue sources used by or available to the City to support development, maintenance, or operation of public facilities and services:

- Property tax
- Sales tax
- User fees
- Development fees
- Quimby Act (Park) dedications
- Business improvement districts
- Community facilities and special assessment districts
- Municipal bonds
- Special taxes
- County, state, and federal funding

Planning Studies and Reports (PSR)

The City conducts studies and produces reports to collect and evaluate information related to specific issues. These studies and reports are undertaken at the direction of the City Council as needed or are prepared annually to report on the status and implementation of the General Plan or a Master Plan.

City Services and Operations (CSO)

The City provides a broad range of services to its residents, businesses, and visitors and manages and operates its facilities to meet community needs. How the City provides services and carries out its operations makes a significant difference in how effectively the General Plan is implemented.

Inter-governmental Coordination (IGC)

The City must coordinate with numerous local, regional, state, and federal agencies to implement the General Plan. These agencies provide services, facilities, or funding and administer regulations that directly or indirectly affect many issues addressed in the General Plan. The following is a partial list of public agencies that may play a role in implementing the General Plan:

- Local agencies, such as Alameda County, Alameda Local Agency Formation Commission (LAFCo), Hayward Unified School District, Hayward Area Recreation and Park District, and other special districts.
- Regional agencies, such as Association of Bay Area Governments (ABAG), Metropolitan Transportation Commission (MTC), AC Transit, Bay Area Rapid Transit (BART), East Bay Regional Park District (EBRPD), and Bay Conservation and Development Commission (BCDC).
- State agencies, such as Caltrans, General Services, California Environmental Protection Agency (EPA), Native American Heritage Commission (NAHC), and California State University, East Bay.
- Federal agencies, such as U.S. Coast Guard, U.S. Military, U.S. Fish and Wildlife Services (USFWS), U.S. Army Corps of Engineers, and Federal Emergency Management Agency (FEMA).

The City recognizes there are unique public and private partnerships. In those instances where there are public and private partnerships, it will involve both inter-governmental coordination and joint partnerships with the private sector, as described in more detail below.

Joint Partnerships with the Private Sector (JP)

The City can combine its efforts with private sector efforts to improve public service delivery, manage public sector assets, or leverage private sector investment. By expanding the role of the private sector, the City can use its technical, management, and financial resources in creative ways to achieve objectives of the General Plan.

Public Information (PI)

The City can use a wide range of tools to keep the city's residents informed of city services or other issues of current interest. Public information can be distributed through media such as brochures, pamphlets, the City's website and social media sites, mobile device applications and notifications workshops, seminars, public access television, radio, newspapers, public hearings, neighborhood and community meetings, and customer service hotlines.

Specific Implementation Programs

Specific implementation programs are listed in the following tables. Similar to the policies, each implementation program is followed by a set of letters that identifies a type of action or tool that the City will use to carry out the implementation program. Following each implementation program is a description of which policy(ies) the program implements, which City department(s) is responsible for implementation, and which department(s) will support the responsible department(s). Each program also identifies a potential funding source for the program. This is intended only to inform the City budgeting process. It does not commit funding to a program for a given timeframe. The City will determine as part of the annual budget process which programs will be funded based on available City resources and needs. Finally, to the right of each program is a timeline that identifies when the implementation will be completed.

The implementation program tables are organized as follows:

- Table GPA: General Plan Administration Implementation Programs
- Table LU: Land Use and Community Character
- Table M: Mobility
- Table ED: Economic Development
- Table CS: Community Safety
- Table NR: Natural Resources
- Table HAZ: Hazards

- Table EDL: Education and Life-Long Learning
- Table: HQL: Community Health and Quality of Life
- Table PFS: Public Facilities and Services
- Table H: Housing (to be incorporated)
- Table EJ: Environmental Justice

Table M MOBILITY ELEMENT Implementation Programs		2014-2016	2017-2019	2020-2040	Annual	Ongoing
Supporting Department(s)/ Partner(s)	Development Services, Alameda County Transportation Commission, Library and Community Services, Public Works – Utilities and Environmental Services, AC Transit					
Funding Source(s)	General Fund					
4. Regional Connection Improvements. The City shall work with the Alameda County Transportation Commission, AC Transit, and adjacent communities to identify better connections between city roadways, pedestrian ways, bicycle facilities, and transit corridors and neighboring and regional transportation networks. Based on findings from the study, the City shall prepare and submit recommendations to the City Council on priority improvements for better regional transportation connections that should be included in the Capital Improvement Program or Countywide Transportation Plan. <i>[Source: New Program, City Staff] (PSR/IGC)</i>				✓		
Implements Which Policy(ies)	M-2.1, M-2.3					
Responsible Department(s)	Public Works & Utilities – Engineering and Transportation					
Supporting Department(s)/ Partner(s)	City Manager, MTC, AC Transit, City of Fremont, City of Union City, City of San Leandro, Alameda County Transportation Commission, <u>Caltrans</u> , Alameda County					
Funding Source(s)	General Fund					
5. Collision Data Reporting. The City shall prepare and submit bi-annual reports to the City Council that summarize traffic collision data at the top collision locations for automobiles, bicycles, and pedestrians, and recommend improvements where needed. [Source: New Program, City Staff] (PSR)						✓
Implements Which Policy(ies)	M 3.10, M 4.7					
Responsible Department(s)	Public Works – Engineering and Transportation					
Supporting Department(s)/ Partner(s)	Police					
Funding Source(s)	General Fund, Grants					
6. Complete Streets Assessment. The City shall conduct a study of the existing street network to identify streets that can be more complete. Based on findings from the study, the City shall prepare and submit recommendations to the City Council on a priority list of complete streets improvements. [Source: New Program, City Staff] (PSR)				✓		
Implements Which Policy(ies)	M 3.2, M 3.3, M 3.10					

Table M MOBILITY ELEMENT Implementation Programs		2014-2016	2017-2019	2020-2040	Annual	Ongoing
Responsible Department(s)	Public Works—Engineering and Transportation					
Supporting Department(s)/ Partner(s)	Development Services, Fire, Police, Maintenance Services, Public Works—Utilities and Environmental Services					
Funding Source(s)	General Fund, Grants					
7. Underused Rights-of-Way. The City shall conduct a study to identify underused rights-of-way, such as street lanes, open drainage facilities, and railroad corridors, to convert to bikeways, pedestrian ways, trails, and/or landscaping improvements. Based on findings from the study, the City shall prepare and submit recommendations to the City Council on priorities to maximize the use of underused right-of-way for non-motorized facilities or landscaping improvements. <i>[Source: New Program, City Staff] (PSR)</i>						
Implements Which Policy(ies)	M-3.2, M-3.3, M-3.10			✓		
Responsible Department(s)	Public Works—Engineering and Transportation					
Supporting Department(s)/ Partner(s)	Development Services, Public Works—Utilities and Environmental Services, Hayward Area Recreation District, City Attorney					
Funding Source(s)	General Fund					
8. Complete Streets Evaluation. The City shall bi-annually evaluate and report to the City Council on how well the streets and transportation network are serving each category of users. <i>[Source: New Program, City Staff] (PSR)</i>						
Implements Which Policy(ies)	M-3.1, M-3.2, M-3.3, M-3.10					✓
Responsible Department(s)	Public Works—Engineering and & Utilities —Transportation Division					
Supporting Department(s)/ Partner(s)	Development Services, Public Works—Utilities and Environmental Services					
Funding Source(s)	General Fund					
9. Improved Traffic Flow Program. The City shall work with Metropolitan Transportation Commission and the Alameda County Transportation Commission to plan and obtain funding for projects that improve traffic flow on arterials and reduce vehicle idling <i>[Source: New Program, Climate Action Plan] (MPSP/IGC)</i>			✓			✓
Implements Which Policy(ies)	M-4.1, M-4.4					
Responsible Department(s)	Public Works & Utilities —Engineering and Transportation

Supporting Department(s)/ Partner(s)	Development Services					
Funding Source(s)	Wastewater System Improvement Fund, Water System Improvement Fund, Grants					
4.  Water Conservation Standards. The City shall develop and adopt Water Conservation Standards within the Municipal Code for households, businesses, industries, and public infrastructure. <i>[Source: New Program, City staff] (RDR)</i>						
Implements Which Policy(ies)	NR 6.9 through NR 6.16		✓			
Responsible Department(s)	Public Works—Utilities and Environmental Services					
Supporting Department(s)/ Partner(s)	Development Services					
Funding Source(s)	Water Enterprise Fund					
5.  Residential Energy Performance Assessment and Disclosure Ordinance. Not sooner than 2017, the City shall consider adopting a Residential Energy Performance Assessment and Disclosure (EPAD-R) Ordinance for detached single-family homes and multi-family homes. The EPAD-R Ordinance may include the following:						
▪ energy performance disclosures at certain points or thresholds						
▪ use of a free online tool such as the Environmental Protection Agency's Home Energy Yardstick for self-assessment, which takes into account the size of the home and number of occupants						
▪ alternatively, use of a low-cost assessment tool such as the Department of Energy's Home Energy Score			✓	✓		
▪ flexible exemption provisions including:—						
○ the age of the building,						
○ foreclosures or short sales,						
○ recent energy efficiency upgrades,						
○ an owner providing 12 consecutive monthly utility bills from the previous two years

Hi Erik! My name is David, and I live in Hayward. I love this city, and want it's natural spaces to be safer and more beneficial for everybody, humans and wildlife alike.

Governor Gavin Newsom signed [Senate Bill 676](#), October 8, that allows local municipalities to ban residents from installing fake grass as drought-tolerant landscape – it has to be real plants.

Artificial turf is becoming an increasing concern. Not only does it add large amounts of plastic to the environment and heat up the surroundings, it does not even save much water, as it is recommended to rake and "wash" it regularly to maintain appearance and remove debris or pet waste. It seems that it doesn't last as long as predicted, as little as 8-10 years. It is often made up of polypropylene fibers and rubber crumb from tires. When the turf is exposed to sunlight, the turf breaks down and releases toxic chemicals and heavy metals into the ecosystem. During rain, particles are washed off and get into the environment and have started to show up in waterways and ecosystems. Researchers note that there is no way to contain this runoff from the turf.

Will the City of Hayward be supporting the ban of installing fake grass within the scope of the new climate action plan?

Thank you for your time and consideration.

Best,
David

Good afternoon!

Im sorry if I'm late bringing this up, but it's just recently been brought to my attention., and as a resident of Hayward, I thought you should let you know that I'm concerned with the use of artificial turf to help save water & get rid of gas lawn mowers.

I have had the opportunities to visit a neighborhood in Redwood City that have a LOT of yards covered in artificial grass. Some look better than others, and I'm sure that has to do with the cost, which I've heard can be quite high, but I never had the opportunity to talk to any of them to see how much they actually hose it down to clean it, how long they've had it, is it holding up & if they would do it again.

I am hoping you (or your staff) will before making this part of the new Green proposal for Hayward. The neighborhood I'm referring to is in the Redwood Shores area & I'd be happy to show you if you'd like.

There has been talk of them wearing down & the plastics & chemicals inside the turf to flow to open water, giving more plastic for fish to swim through & eat!

Then there's the cost of putting the used ones into the trash! That's a LOT of plastic! I'm thinking I'd rather have plastic straws or grocery bags instead of plastic lawns, but that's that's just me! Ok - I'm being sarcastic, but you get my drift, right?!?! Why is that plastic ok, but not the others!! And besides, we already have an issue with disposing of broken windmill parts & batteries from EV's!! The "green" items that everyone is pushing have minuses of their own that no one talks about, but should!! Not all solutions are better for us than the "problems" were trying to replace!! The

Please take all of this into consideration before deciding whether we should mandate them or ban them completely.

Thank you for your time!
Gwen Dossey

Subject: Please BAN synthetic turf

CAUTION: This is an external email. Do not click on links or open attachments unless you know the content is safe.

Hi Erik,

I'm happy to hear that you will be discussing the many issues that come with synthetic turf at tomorrow's Sustainability Committee meeting.

Many of my neighbors have removed all or almost all living vegetation from their properties and installed synthetic turf in place of their lawns. It's not a pleasant sight and obviously very bad for the environment. I encourage your committee to recommend that our elected officials develop an immediate ban on synthetic turf on residential and commercial properties, and continue to encourage the planting of natives and drought tolerant landscapes, and of course, MORE trees.

Thank you for your support.

Hi Erik! My name is Josh, and I live in Hayward. I love this city, and want it's natural spaces to be safer and more beneficial for everybody, humans and wildlife alike.

Governor Gavin Newsom signed [Senate Bill 676](#), October 8, that allows local municipalities to ban residents from installing fake grass as drought-tolerant landscape – it has to be real plants.

Artificial turf is becoming an increasing concern. Not only does it add large amounts of plastic to the environment and heat up the surroundings, it does not even save much water, as it is recommended to rake and "wash" it regularly to maintain appearance and remove debris or pet waste. It seems that it doesn't last as long as predicted, as little as 8-10 years. It is often made up of polypropylene fibers and rubber crumb from tires. When the turf is exposed to sunlight, the turf breaks down and releases toxic chemicals and heavy metals into the ecosystem. During rain, particles are washed off and get into the environment and have started to show up in waterways and ecosystems. Researchers note that there is no way to contain this runoff from the turf.

Will the City of Hayward be supporting the ban of installing fake grass within the scope of the new climate action plan?

Thank you for your time and consideration.

Best,
Josh Rubietta

There are so many native California plants one can use instead of KENTUCKY BLUE GRASS, and/artificial turf. Please consider using something like frog grass, Phyla nodiflora, or other NATIVE TO CALIFORNIA PLANTS! These will attract native bugs which will attract native birds. Give native birds more food so they are healthy and so good for our environment.

18.) Environmental Education Programs. The City shall coordinate with Alameda County, Pacific Gas & Electric Company, non-profit organizations, and other agencies and businesses to develop and implement an Environmental Education Program. Source: New Program, Climate Action Plan] (IGC/PI/MPSP) } Implements Which Policy(ies) NR-1.1 through NR-1.12 and NR-3.1 through NR- 3.5, PFS-7.23 Responsible Department(s) City Manager, Public Works & Utilities

This single focus is, I believe, the most impactful if thoughtfully conducted. Not only education but community resiliency and environmental protection can be expanded through a well-thought-out engagement process with local communities.

I also believe it is of the utmost importance to explore and utilize innovative and radical approaches outside the usual strategies for learning and engagement, in order to honestly uphold cultural wisdom and knowledge for the common good.

So much of what has transpired in the City of Hayward over the 20+ years during which time I've been actively engaged, present and residing in south Hayward, is now either being manifested in a positive and encouraging way or significant for total failure in planning and policy.

I want to commend the sustainability staff on your excellent work in preparing these documents for public review and voting by City Council. My circles who are advocating for natural landscapes and environmental protection as a quality of life element for humans are astonished that the City of Hayward has exceeded implementation of the tree canopy beyond that of surrounding cities and acknowledges that Hayward can do even more to enhance the urban forest. Please allow us to help in supporting this vision.

I urge you to be bold in working with local groups and small nonprofit organizations who have brilliant ideas and vision for positive change. Many of these groups have been discounted or overlooked because they are new without a track record or simply overshadowed by dominant agencies and organizations.

I also want to commend all staff and the City of Hayward in general for drafting these comprehensive and progressive plans that far exceed the work of Alameda County for climate action and equity draft plans.

Thank you for all your hard work.

Sincerely,
Sandra Frost

Subject: Public Comments, Sustainability Committee 11/13/23: Partnering with HUSD

CAUTION: This is an external email. Do not click on links or open attachments unless you know the content is safe.

To City Council:

I do not see that Hayward Unified School District can be a collaborative partner in the City of Hayward's draft plans for climate change, environmental protection, and resilient communities.

The structure and administration of HUSD is noncohesive as a school district. Each of the schools within this district have strengths or weaknesses based on their own staffing and leadership, and the strong support of parents or inability to commit because of necessary survival requirements.

It is my observation that the school district has become entrenched, politicized, and impotent to protect and uplift all students. Hence, the movement to charter schools, community-held public schools and private or home-school education. HUSD is a disgrace. Teachers who truly care about their students do not deserve the lack of support from school administrators and the HUSD.

It is wishful thinking, in my opinion, that HUSD as a district administration would have interest or intention as a collaborative partner working cooperatively with any other agency. HUSD has failed students, teachers, parents and community. We deserve better, most especially the children.

Respectfully,
Sandra Frost

Subject: Public Comments, Sustainability Committee 11/13/23: All In Eats, food recovery, community composting

CAUTION: This is an external email. Do not click on links or open attachments unless you know the content is safe.

To City Council:

It is my opinion that this program supported by Alameda County has run through its life expectancy. There are other more progressive and visionary programs and efforts that need endorsement, support and uplift. The multi-millions of dollars which has allowed DSAL and Dig Deep Farms evolving into All In Eats to spotlight the very real need for distribution of fresh and wholesome foods to everyone has been commendable but short-sighted and siloed from early stages of development. There is no business plan to sustain the model.

It was pointed out in early stages of the Dig Deep food hub that the facility will not cover the needs of the surrounding communities. This has proven to be true. Dig Deep Farms has held resources of money, land, and power from initiation. The Dig Deep Farms and All In Eats model was presented to Alameda County as the only model to address hunger and food insecurity. This is a wrong representation. Without support from the late Supervisor Wilma Chan and All In Eats, the behemoth organization of Dig Deep Farms is foundering.

I am incredibly dismayed that my city is blindly willing to hand over significant community resources to an unreliable entity. There are other groups, other methods and means to feed people and create self-reliance, resiliency and strong local support networks for food security.

I urge the City Council and staff to look further, research deeper, and reconsider handing over valuable and precious community assets in this way.

Successful community composting works at grassroots with multiple compost hubs, which are circularly directed into nearby community gardens and urban farms, for local neighborhood based food production, distribution points and commerce.

I urge you to research especially those models in peripheral agrarian or periurban communities, other countries, other cultures.

Respectfully,
Sandra Frost
