Regarding: Position of Deputy Chief, Field Operations & Enforcement Division,
Bureau of Automotive Repair, Department of Consumer Affairs

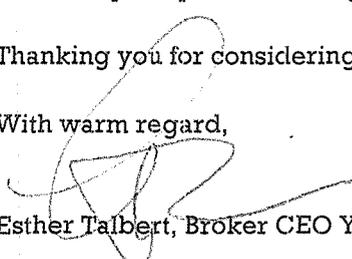

Dear Honorable Jerry Brown:

"A vision without a task is but a dream, a task without a vision is drudgery, a vision and a task is the hope of the world." As with any new undertaking or important position there is a new void that must be filled with new life and energy coupled with a desire to serve in a positive and productive manner.

It is my professional opinion and belief, that Charles W. Peters would be an excellent consideration for the current opening position of Deputy Chief Field Operations & Enforcement of the Bureau of Automotive Repair. His background is such that would greatly benefit the task at hand with good judgement and leadership coupled with integrity and a good work ethic.

Thanking you for considering him for this position.

With warm regard,

Esther Talbert, Broker CEO Yavapai Realty

RE: Bureau of Automotive Repair Open Position: Deputy Chief, Field
Operations and Enforcement Division

To whom it may concern:

My understanding is that there is a current opening at the Bureau of
Automotive Repair for a new Deputy Chief, Field Operations and Enforcement
Division due to the pending retirement of the current position holder Mr. Dan
Povey.

I have been made aware that one of the applicants is Charlie Peters whom I
have known for a long time.

Having worked with Dan Povey in the past I always had the highest respect
and admiration in the way he conducted himself and represented the Bureau.
He always looked at each situation with clear eyes and decided issues not
only on the law but also what was right, and how to make sure everyone
involved got a fair shake. Charlie is a lot like that and I can see him
operating with the same even handedness that Dan displayed so well.

Over the years, I have come to know Charlie as someone who also has a
laser focus on being an advocate for good public policy and is someone
whom the Bureau and Industry could work with to help shape many of the
complicated issues we face.

I would ask that you give his application due consideration.

Sincerely,
