**March 2019**

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
<b>Air Quality</b>				
<p><b>Impact AQ-1:</b> The project would generate dust during construction activities that would affect nearby sensitive receptors.</p>	<p><b>MM AQ-1.1:</b> During any construction period which causes ground disturbance, the applicant shall ensure that the project contractor implement measures to control dust and exhaust. Implementation of the measures recommended by BAAQMD and listed below would reduce the air quality impacts associated with grading and new construction to a less than significant level. The contractor shall implement the following best management practices that are required of all projects:</p> <ul style="list-style-type: none"> <li>• All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.</li> <li>• All haul trucks transporting soil, sand, or other loose material off-site shall be covered.</li> <li>• All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.</li> <li>• All vehicle speeds on unpaved roads shall be limited to 15 mph.</li> </ul>	<p>The applicant and contractors shall be responsible for implementing the mitigation measures during all phases of construction.</p>	<p>All measures shall be printed on all construction documents, contracts, and project plans and shall be reviewed by the Director of Development Services prior to the issuance of demolition, grading, and building permits.</p>	<p>Director of Development Services or his or her designee</p>

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
	<ul style="list-style-type: none"> <li>• All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used.</li> <li>• Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to five (5) minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points.</li> <li>• All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation.</li> <li>• Post a publicly visible sign with the telephone number and person to contact at the Lead Agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The Air District's phone</li> </ul>

	number shall also be visible to ensure compliance with applicable regulations.			
<p><b>Impact AQ-2:</b> Construction of the proposed project would generate significant quantities of toxic air contaminant emissions.</p>	<p><b>MM AQ-2.1:</b> The project shall develop a plan demonstrating that the off-road equipment used on-site to construct the project would achieve a fleet-wide average 78 percent reduction in DPM exhaust emissions. One feasible plan to achieve this reduction would include the following:</p> <ul style="list-style-type: none"> <li>• All mobile diesel-powered off-road equipment larger than 50 horsepower and operating on the site for more than two days continuously shall meet, at a minimum, U.S. EPA particulate matter emissions standards for Tier 4 engines or equivalent. The use of equipment that includes CARB-certified Level 3 Diesel Particulate Filters or alternatively-fueled equipment (i.e., non-diesel) would meet this requirement. Other measures may include the use of added exhaust devices, or a combination of measures, provided that these measures are approved by the City and demonstrated to</li> </ul>	<p>Prior to grading or building permit, the applicant shall provide the plan demonstrating necessary emissions reduction to the Director of Development Services for review and approval.</p> <p>The applicant and contractors shall be responsible for implementing the mitigation measures during all phases of construction.</p>	<p>All measures shall be printed on all construction documents, contracts, and project plans.</p>	<p>Director of Development Services or his or her designee</p>

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
	<p>reduce community risk impacts to less than significant.</p> <ul style="list-style-type: none"> <li>The project shall be required to implement the measures listed above as conditions of approval. These measures shall be placed on project plan documents prior to issuance of any building permits for the project. The proposed project, therefore, would not result in a significant air quality impact due to construction dust emissions.</li> </ul>			
<b>Biological Resources</b>				
<p><b>Impact BIO-1:</b> Construction of the proposed project could result in significant impacts to special-status species.</p>	<p><b>MM BIO-1.1:</b></p> <ul style="list-style-type: none"> <li>A qualified biologist will conduct an environmental education program for all persons employed or otherwise working on the project site before they perform any work. The program shall consist of a presentation from the biologist that includes a discussion of the biology and general behavior of special-status species on or near the site; information about the distribution and habitat needs of the species; sensitivity of the species to human activities; the status of the species pursuant to the Federal Endangered Species Act, the</li> </ul>	<p>The project applicant will be responsible for ensuring MM BIO-1.1 occurs prior to issuance of grading permits and prior to any site disturbance including tree removal.</p>	<p>The applicant shall provide to the Director of Development Services copies of the form stating that the construction workers have received the training.</p>	<p>Director of Development Services or his or her designee</p>

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
	<p>California Endangered Species Act, and the California Fish and Game Code including legal protection; recovery efforts; penalties for violations; and any project-specific protective measures described in this document or any subsequent documents such as an Incidental Take Permit and/or Biological Opinion. Interpretation shall be provided for non-English speaking workers, and the same instruction shall be provided for any new workers before their performing work on the site. The biologist shall prepare and distribute wallet-sized cards or a fact sheet handout containing this information for workers to carry on the site. Upon completion of the program, employees shall sign a form stating they attended the program and understand all the protection measures. Copies of the form shall be provided for the City.</p> <ul style="list-style-type: none"> <li>• A qualified biologist will be on the site daily to monitor initial vegetation clearing and ground-disturbing activities.</li> </ul>		<p>All measures shall be printed on all construction documents and fact sheet handouts and reviewed by the Director of Development Services prior to tree removal and the issuance of demolition, grading, and building permits.</p>	

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
<p><b>Impact BIO-2:</b> Construction of the proposed project could adversely impact the white-tailed kite or other migratory bird species.</p>	<p><b>MM BIO-2.1:</b> Information on white-tailed kites and other protected migratory birds shall be included in the environmental education program, as detailed in Mitigation Measure MM BIO – 1.1.</p> <p><b>MM BIO – 2.2:</b> If feasible, construction activities shall occur during the non-breeding season (September 1 - January 31). If such activities are scheduled during the breeding season, a qualified biologist shall conduct a preconstruction nest survey of all trees and shrubs and other suitable nesting habitat in and within 300 feet of the limits of work. The survey shall be conducted not more than five (5) days prior to the start of work. If the survey indicates the potential presence of nesting white-tailed kites or other birds, the biologist shall determine an appropriately sized buffer around the nest and no work will be allowed in this buffer until the young have successfully fledged. The size of the nest buffer will be determined by a qualified biologist in consultation with CDFW and will be based on the nesting species and its sensitivity to</p>	<p>The project applicant and contractors shall implement MM BIO-2.1 and MM BIO-2.2 prior to issuance of grading permits and prior to any site disturbance including tree removal. The survey results shall be provided no more than five days prior to start of work.</p>	<p>Refer to MM BIO-1.1</p> <p>A final report documenting the survey effort and any protection measures implemented by the project shall be submitted to the City Planning Department prior to the start of any demolition or grading activity.</p>	<p>Director of Development Services or his or her designee</p>

**MITIGATION MONITORING AND REPORTING PROGRAM**  
**Cavallo Highlands Residential Project**

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
	<p>disturbance. In general, buffer sizes of up to 300 feet for raptors and 50 feet for other birds would prevent disturbance, but these buffers may be increased or decreased, as appropriate, depending on the bird species and the level of disturbance anticipated near the nest.</p>			
<p><b>Impact BIO – 3:</b>            Construction of the proposed project could result in significant impacts to the pallid bat.</p>	<p><b>MM BIO – 3.1:</b></p> <ul style="list-style-type: none"> <li><i>Pre-demolition Bat Survey.</i> A qualified bat biologist shall conduct a bat survey, no more than 14 days prior to the removal of any buildings or structures, to determine if bats are present. No activities that would result in disturbance to an active roost shall proceed prior to completion of the survey. If no active roosts are observed, then no further action shall be warranted. If a maternity roost is present, a qualified biologist shall determine the extent of a construction-free buffer zone around the active nurseries located during the survey. CDFW shall be notified of any active nurseries within the demolition/construction zone. No demolition or construction activities shall occur within the construction-free buffer zone between March 1 and August 31 to avoid construction disturbance to the maternity roost, as determined by the bat</li> </ul>	<p>The project applicant will ensure MM BIO-3.1 occurs prior to issuance of grading or demolition permits.</p>	<p>A final report documenting the survey effort and any protection measures implemented by the project shall be submitted to the City Planning Department prior to the start of any demolition or grading activity.</p>	<p>Director of Development Services or his or her designee</p>

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
			jurisdictional areas.	
<p><b>Impact BIO – 8:</b>            Development of the proposed project would result in significant impacts to on-site protected trees and one off-site tree.</p>	<p><b>MM BIO – 8.1:</b> All applicable requirements shall be followed and all permits obtained as required by the City’s Tree Ordinance (HMC Chapter 10, Article 15). Per that ordinance, every effort shall be made to preserve the character of the area and the more valuable tree specimens on site to the greatest extent practicable. Final landscape plans shall be reviewed and approved by the City of Hayward Landscape Architect prior to issuance of any grading, trenching, encroachment, demolition, or building permit for development. Final landscape plans shall clearly identify all “protected trees,” as defined in the Tree Preservation Ordinance, and all trees to be removed from the project site and the size, location, type, value of trees and specify the species of all replacement trees.</p> <p><b>MM BIO – 8.2:</b> The project applicant shall implement all tree protection measures recommended in the Arborist Report prepared for the project, which include the following:</p>	<p>The applicant shall provide final landscape plans prior to issuance of any grading, trenching, encroachment, demolition, or building permit for development.</p> <p>Prior to and during all construction activity</p>	<p>Final landscape plans shall be reviewed and approved by the City of Hayward Landscape Architect. The project applicant shall pay applicable replacement values as specified in the arborist report and provide replacement trees and final landscape plan.</p>	<p>City of Hayward Landscape Architect and Director of Development Services (or his or her designee)</p>

	<ul style="list-style-type: none"> <li>• <i>Tree Avoidance.</i> The project plan shall avoid protected trees adjacent to the project site. The project plan shall incorporate placement of Tree Protection Fencing (TPF) outside the drip line of the off-site protected trees. The location of the TPF shall be shown on the project plans.</li>   <li>• <i>Excavation.</i> Within the dripline of retained trees, digging should be done with low impact machinery and hand tools. If the roots of retained trees become exposed during construction and need to be removed to allow construction to proceed, these roots must be cut cleanly with a sharp saw blade. Tree roots shall not be pulled or torn.</li>   <li>• <i>Tree Protection Fencing.</i> Prior to the start of construction, TPF shall be installed at the drip line of protected trees to be retained. The TPF should be maintained during the construction process to prevent direct damage to trees and their growing environment. The TPF should consist of high density polyethylene fencing with 3.5 inch by 1.5 inch openings (orange warning barrier fence) supported by metal “T-post” fence posts.</li>   <li>• <i>Use of Heavy Equipment.</i> Heavy machinery should not be staged or operated within the drip line of retained trees.</li> </ul>

<b>Impacts</b>	<b>Mitigation and/or Avoidance Measure(s)</b>	<b>Timeframe and Responsibility for Implementation</b>	<b>Method of Compliance</b>	<b>Oversight of Implementation</b>
<b>Geology and Soils</b>				
<p><b>Impact GEO – 1:</b> The project during construction would result in soil erosion, and buildings and pavement constructed as part of the project could be subject to soil hazards related to expansive soils and differential settlement.</p>	<p><b>MM GEO – 1.1:</b> Buildings shall be designed and constructed in accordance with a final design-level geotechnical investigation to be completed for the project by a qualified professional and submitted to the Department of Community and Economic Development. The final design-level geotechnical investigation shall identify requirement for the placement of fill on the project site and building foundations.</p> <p><b>MM GEO – 1.2:</b> The civil engineer and the project landscape contractor shall implement a comprehensive erosion control plan to account for seasonal rainfall during and following construction. The project engineering geologist shall make periodic inspections of the site drainage and erosion control features for a period of two years.</p>	<p>The project applicant and contractors shall be responsible for implementing the mitigation measures during all phases of construction and following construction.</p>	<p>All measures shall be printed on all construction documents, contracts, and project plans and shall be reviewed by the Director of Development Services prior to the issuance of grading, and building permits.</p>	<p>Director of Development Services or his or her designee</p>
<b>Hazards and Hazardous Materials</b>				
<p><b>Impact HAZ – 1:</b> The proposed project is located in a high fire hazard severity zone and</p>	<p><b>MM HAZ – 1.1:</b> The project would be designed, constructed, and maintained consistent with the City’s Urban/Wildland Interface Guidelines including the incorporation of fire-resistant building materials, fire-resistant design features, and a fuel management</p>	<p>The applicant would ensure MM HAZ-1.1 occurs</p>	<p>The final measures to be incorporated in the project would be reviewed</p>	<p>Director of Development Services or his or her designee</p>

therefore may contribute to adverse impacts from wildfires.	program in the CC&Rs of the Homeowners' Association. The final measures to be incorporated in the project would be reviewed and approved by the Fire Marshall prior to the issuance of a building permit.	prior to issuance of a building permit.	and approved by the Fire Marshall.	
<b>Noise and Vibration</b>				
<p><b>Impact NV – 1:</b> The project would construct single-family residences adjacent to noise sensitive, residential and educational uses which could result in temporary disturbances during construction.</p>	<p><b>MM NV – 1.1:</b> The project applicant shall incorporate the following practices into the construction documents to be implemented by the project contractor:</p> <ul style="list-style-type: none"> <li>• Maximize the physical separation between noise generators and noise receptors. Such separation includes, but is not limited to, the following measures: <ul style="list-style-type: none"> <li>- Use heavy-duty mufflers for stationary equipment and barriers around particularly noisy areas of the site or around the entire site;</li> <li>- Use shields, impervious fences, or other physical sound barriers to inhibit transmission of noise to sensitive receptors;</li> <li>- Locate stationary equipment to minimize noise impacts on the community;</li> <li>- Minimize backing movements of equipment;</li> </ul> </li> </ul>	<p>The project applicant shall ensure MM NV-1.1 occurs during all phases of construction.</p> <p>Copies of the advance notice of construction activity shall be provided to the City prior to grading permit.</p>	<p>The project sponsor shall designate a “disturbance coordinator” for construction activities to implement reasonable measures to correct the noise problem.</p>	<p>Director of Development Services or his or her designee</p>

	<ul style="list-style-type: none"> <li>• Use quiet construction equipment whenever possible;</li> <li>• Impact equipment (e.g., jack hammers and pavement breakers) shall be hydraulically or electrically powered wherever possible to avoid noise associated with compressed air exhaust from pneumatically-powered tools. Compressed air exhaust silencers shall be used on other equipment. Other quieter procedures, such as drilling rather than using impact equipment, shall be used whenever feasible;</li> <li>• Prohibit unnecessary idling of internal combustion engines; and</li> <li>• Select routes for movement of construction-related vehicles and equipment in conjunction with the Hayward Economic and Development Services and Public Works Department so that noise-sensitive areas, including residences and schools, are avoided as much as possible.</li> <li>• The project sponsor shall designate a “disturbance coordinator” for construction activities. The coordinator would be responsible for responding to any local complaints regarding construction noise and vibration. The coordinator would</li> </ul>
