**Subject:** Re: Public Comments for Hayward Sustainability Committee meeting

Dear Hayward City Councilmembers,

Please accept this public comment in support of switching the default energy product for East Bay Community Energy to Brilliant 100 for all resident customers. Combating climate change is extremely important as we are already seeing the beginning effects of a warming atmosphere in California with more fires and more frequent droughts. I urge the Council to choose Brilliant 100 as the default for resident customers of East Bay Community Energy so that more households run on 100% clean renewable energy and combat our warming climate.

Please submit these comments for consideration at today's meeting.

Thank you,

Amanda Groziak  
Hayward voting citizen
