Keeping Skywest in open space is aligned with Hayward's Master plan.

One of the Hayward's priorities as detailed in the 2040 Looking Forward General Plan states, "Guiding Principle #8: Hayward should preserve, enhance, increase, and connect its baylands, hillsides, greenway trails, and regional parks to protect environmental resources, mitigate the impacts of rising sea levels, and provide opportunities to live an active outdoor lifestyle."

Keeping Skywest in open space also supports Alameda County's Sustainability Plan.

Keeping Skywest in open space is consistent with the County's Climate Action Plan for Government Services and Operations- doing all we can to reduce human impacts of climate change by not creating more paved heat absorbing areas in our community.

We have less than 1/3 of an acre of parks per 1000 folks in the area surrounding Skywest. Our disadvantaged communities need open space and places of quiet reflection in these stressful times.
