EMAIL FROM ALICIA G. LAWRENCE

From: Alicia Lawrence <>

Sent: Tuesday, May 28, 2019 9:58 AM

To: List-Mayor-Council <List-Mayor-Council@hayward-ca.gov>

Cc: The Hayward Collective <thecollective@thehaywardcollective.com>

Subject: Parcel 8

CAUTION: This is an external email. Do not click on links or open attachments unless you know the content is safe.

Dear Mayor and City Council,

It has been brought to my attention that this evening's closed session will include a discussion on negotiations of Caltrans Parcel 8.

I want to make clear my personal support for the tenants of Parcel 8. Their efforts for agency and control of the land and homes they occupy is not wholly apart from The Hayward Collective's anti-displacement efforts.

The Hayward Collective made it very clear how we felt about the evictions and displacement of the Parcel 5 tenants. By the time we understood what was happening on Parcel 5; it was too late.

But it is not too late for the Parcel 8 tenants. And it is not too late for the City of Hayward to affirm that community-controlled land has a distinct and important role in stabilizing vulnerable communities.

I know your goal is to maximize the sales of these parcels so that the City of Hayward gets money. I know the red in the City of Hayward's financial forecasts has only recently diminished. But it is not ok to prop yourselves up on the backs of vulnerable community members.

I hope you continue to collaborate and work with the Parcel 8 tenants and that the negotiations on the table tonight do not threaten what they are trying to achieve.

Sincerely,
Alicia G. Lawrence
Member, The Hayward Collective

AGENDA QUESTIONS & ANSWERS

Item 6

AGENDA QUESTIONS & ANSWERS

MEETING DATE: May 28, 2019

Item #6: Professional Services Agreement with St. Francis Electric, Inc.: Approval of Amendment No. 2 to Increase the Agreement by \$200,000 for a Total Not-to-Exceed Amount of \$475,000

In reviewing the agenda item regarding the contract to address streetlights, a couple questions came to mind.

1. How many streetlights are damaged each year?

2. Are there any visible trends to this issue (ex: specific intersections that need frequent repairs, times of day/week/year that have higher incidents)?

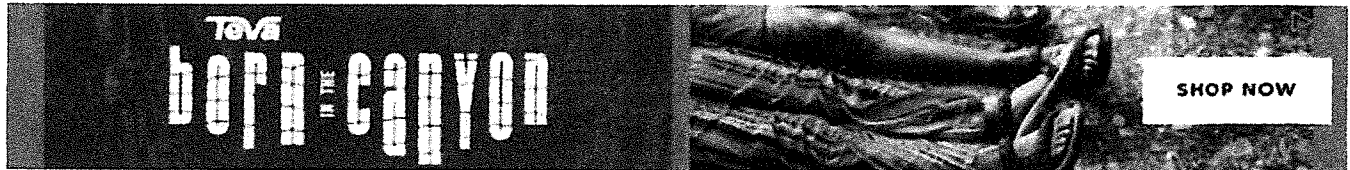

1. Staff approximates about 3-5 traffic cabinets hit per year, 12-20 street lights per year, and 16 signal poles per year.

2. Staff sees no trends based on time of day or year, but a trend regarding high speed corridors and corners.

Some of the light poles are decorative ones installed at Mission project and are several times more expensive than the non-decorative ones.

Schools without working fire alarms after Sandy

Seven On Your Side

By abc7NY Archive

Friday, September 6, 2013

NEW YORK

But for thousands, their schools will be missing something: working fire alarms!

Parents alarmed this could happen, reached out the 7 on your side for answers.

Would you send your kid to school with no working fire alarms? As the school year begins, that's the question scores of parents at four of New York public schools are asking themselves.

"We need safety in our kids' school," said Lina Elshawari, a parent.

Brought to tears out of fear her three kids could die in a fire while at school, Lina Elshawari says New York City should be ashamed it's allowing students inside a school with no working fire alarms.

"There's nothing for a teacher on the wall to pull that's what it comes down to," said Steven Jasiak, a P.S. 207 parent.

P.S. 207, the Howard Beach elementary school where their kids go, hasn't had functional fire alarms since October 29th.

The system, housed in the school basement along with the boiler, was destroyed during Superstorm Sandy and it's still not fixed in time for this school year.

Fire alarm systems for schools

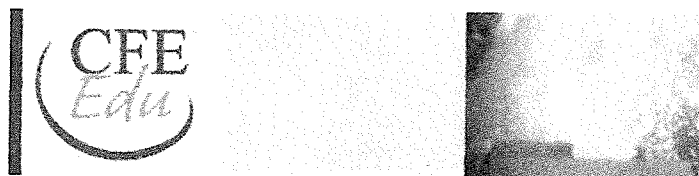

BY MANUELITA E. DAVID, SCHIRMER ENGINEERING, AN AON GLOBAL CO., CONCORD, CALIF. SEPTEMBER 1, 2009

[View the full story, including all images and figures, in our monthly digital edition](#)

Children are our future, so when it comes to their safety, parents, guardians, and adults have a duty to protect them. However, there are times when parents cannot be there to protect their children, such as when they are in school. Once children are on school property, their safety and well-being become the responsibility of the school personnel and administrators.

In reality, the safety and well-being of the children occurs long before they even step foot on a school campus. The preliminary stage for safety in schools starts when architectural plans are developed for the school and its buildings. These plans are reviewed by the state, county, or city building officials to ensure the buildings are being built per applicable code requirements.

SPONSORED BY **PANDUIT**[®]

Authorities having jurisdiction (AHJ), code officials, field inspectors, and school districts have the responsibility to ensure each building is built and maintained properly. Although construction of buildings is an important safety factor, building systems—such as security systems, fire sprinkler, and fire alarm systems—are equally important when it comes to protecting children and adults. Without a fire alarm system, most schools cannot be opened or occupied.

This article provides information to fire alarm designers, code officials, and school personnel about the basic requirements for school fire alarm systems, as well as the various design approaches for complying with the applicable codes and meeting the different fire safety needs of schools.

What the codes say

The [International Building Code \(IBC\)](#) and [International Fire Code \(IFC\)](#) provide minimum requirements for fire alarm systems, which consist of manual fire alarm boxes throughout the school. California adopts even more stringent codes, such as automatic detection throughout the buildings,

New bill could legalize liquid cremation in Texas

By **Sophia Constantine** | February 8, 2017 at 9:12 PM CST - Updated July 9 at 10:20 PM

(KLTv) - The end is inevitable for all of us. When a loved one dies, families must decide whether to bury or cremate their remains. A Texas lawmaker wants to add a third, relatively new option to the list which would use liquid to dissolve the body.

"We are open to all options. We want to be able to help and assist a family do whatever they chose to do," said Rosewood Premier Funeral Home Marketing and Public Relations Director Savoy Fambles.

And a new option, one that leaves less of a carbon footprint could be coming to Texas. It's called alkaline hydrolysis or liquid cremation.

"It is really the same process as regular cremation, it just uses a water process as opposed to fire," Fambles said.

A hyperbaric chamber is used to steam off all soft tissue and organs, leaving bone fragments behind in a flour like white powder.

"And the bone fragments is still going to be returned to family members as ashes," Fambles added.

Dirty Electricity

Higher and Constant Ambient radiation is the problem now...meters, cell phones, wifi, all sending out waves through you. The long term health effects to our population are unknown at this stage. To add to the danger, Mini Cell phone broadcasting transmitters are being installed at the same time and right next to the "Smart" Meters. "Need information and data relative to the creation and designed use of Smart Meters. Is this as I suspect to be used to identify areas in the USA and Britain to locate population groups that are of lower intelligence and subject to extermination. In short the kill off of the useless eaters and non productive groups. Blacks, Browns, Asians, lower class Whites etc . We suspect they will target these people for termination by ratcheting up the voltage to a point which would render them mumified, docile or dead. I believe the purpose of making smart meters mandatory is to enable the CIA, NSA and the dept of Naval Intelligence to soon determine which portions of the population are to be terminated in accordance with the Illuminazi plan to reduce the population by 95%. Obviously Kissinger, The Rothchilds, The Rockefellers, and others of this Evilarchy are party to this plan to reduce the population of the planet by 95%. Bill Gates, Ted The Terrible Turner, and other Malthusians are actively engaged in bringing about this mass murder that is obviously underway. We need those of you who understand how this grid system works and how the genicidal program is to be launched. Obviously this program out Hitlers Hitler. Nothing like it in the history of Mankind comes close to the carnage that could well be before us were we not to act. I need your help to put the pieces of this GeoGenicidal jigsaw puzzle together. Only those of you who have knowledge and information at the highest level need make contact. We need information with specifics explaining how this control grid is in place and how it can be dismantled." Thank You...Anthony J Hilder contact: anthonyjhilder@hotmail.com Be a Whistle Blower Researcher or Serious Political Activist. Are you and executive and engineer in a positions of mid to high level post working for a major electrical provider in the USA, UK, or Sweden and have knowledge as to how much damage one of these Death Meters can do. We are hunting for whistle blowers. I will keep you identity visual and verbal from public views. Will do interviews behind screens and with voice alternators to cover the privacy issue. Weve already had two who have given us large amounts of pertinent information relative to the crimes now in the process of being committed. anthonyjhilder@hotmail.com

California 'Smart' Meter Opt-Out Deci...

A parade of over 50 people opposed to wireless 'smart' meters state the reasons for their resistance in the lead-up to the precedent-setting California Public Utilities Commission's vote, which, despite its many flaws, represents an incremental victory for the growing international Stop Smart Meter movement.

Rolling Back the Roll-Out

Well-intentioned, but miss-informed advocates of a world-wide, wireless energy grid are watching developments in California and elsewhere with consternation as their ill-conceived agenda begins to unravel due to massive and growing science-based public opposition and the plan's own internal technical problems.
