Dear Planning Commissioners ,

As a Hayward resident, I know how tough the last 18 months have been for working families in our community. We need to kick start our local economy and give more opportunity to families that are struggling.

That's why I urge you to support the Dermody Partners project on Clawiter Road. As a responsible community partner, this developer has committed to use a local construction workforce and provide an opportunity for those in our apprenticeship program to help build the project.

When finished, this project will bring in much needed revenue to the City to help support the services that our community needs.

Thank you for helping get our community back on track!
