

# Community Choice Energy (CCE) in the East Bay

## 2016/2017 Timeline & Major Milestones

Alameda County CCE Steering Committee  
January 6, 2016

# The 2016 Planning Context

Goal is to begin serving customers in early Spring 2017, which means customer notification begins in early February 2017. All major elements must be in place by January 2017.

We've seen a number of delays since original timeline, including the tech study, which will take longer than originally anticipated (complete in mid-May 2016)

**To stay on track and meet the proposed launch date, we need to start working on parallel paths**

These paths include:

1. JPA formation and administration
2. Community outreach/marketing
3. CCE program design, financing, power supply, et al

# JPA Formation Sooner than Later

ATTACHMENT I

1. County will begin JPA formation in Q1 and Q2 2016 with the idea of forming the JPA as a legal entity in late spring/early summer and seating the full Board in Fall of 2016.
2. Earlier formation of a JPA will position the CCE to take advantage of currently favorable energy pricing and potential renewable energy opportunities, such as Altamont wind and upcoming solar projects.
3. If the tech study results look good, the JPA infrastructure will be ready and the Agency can progress faster. If the results are unfavorable, the JPA will not likely move forward.
