Cover Memo

File #: CONS 18-833, **Version:** 1

DATE: December 18, 2018

TO: Mayor and City Council

FROM: Director of Utilities & Environmental Services

SUBJECT

Adopt a Resolution Approving the Plans and Specifications for Phase I of the Recycled Water Treatment Facility Project and Call for Bids

RECOMMENDATION

That Council adopts the attached resolution approving the plans and specifications for the Recycled Water Treatment Facility Project - Phase I and calling for bids to be received on February 5, 2019.

SUMMARY

The City is implementing the Recycled Water Project, which will provide a locally sustainable and drought-proof supply of recycled water to customers for irrigation and industrial uses. In December 2017, Council authorized staff to proceed with design of a City-owned recycled water treatment facility to meet the initial demand for the City's Recycled Water Project. The proposed City-owned recycled water treatment facility would be a package membrane treatment system capable of producing up to 500,000 gallons per day of disinfected tertiary treated recycled water. Design of the treatment facility is almost complete, and the contract documents will be ready to advertise for public bidding on January 3, 2019. Staff is requesting Council's approval of plans and specifications, and to call for bids to be received on February 5, 2019.
