DATE: January 14, 2021

TO: Hayward Area Shoreline Planning Agency

FROM: Erik Pearson, Environmental Services Manager

SUBJECT

Shoreline Adaptation Master Plan Implementation Grant Application

RECOMMENDATION

The Technical Advisory Committee (TAC) recommends that the HASPA Board provides input and guidance on a grant application for the Oro Loma Interim Levee project.

SUMMARY

On December 30, 2020, the TAC submitted a Notice of Interest (NOI) for FEMA's hazard mitigation grant funding for the *Oro Loma Interim Levee*, which is identified in the Shoreline Adaptation Master Plan. A response to the NOI is expected by the end of January. If successful, HASPA will be invited to submit a detailed grant application by May 1, 2021.

The *Oro Loma Interim Levee* project is intended to protect the Oro Loma wastewater treatment plant, nearby residential areas, San Lorenzo Community and the surrounding industrial district from flooding. It includes a flood protection levee designed to meet today's 1% annual chance flood with allowance for mid-range sea level rise but with a foundation system that allows for the levee to be elevated in the future to accommodate a higher elevation with sea level rise. The project also includes a new Bay Trail spur extending inland from the shoreline and could provide a connection across the rail line to San Lorenzo Community Park. A new tide gate and pump station on Bockman Canal is also proposed, which would be planned in coordination with Alameda County Flood Control District.

A memorandum with additional information is attached.
