Cover Memo

File #: ACT 22-003, **Version:** 1

DATE: January 10, 2022

TO: Council Sustainability Committee

FROM: Director of Public Works

SUBJECT

Regulation of Direct Discharge of Stormwater from Private Properties - Information and Discussion

RECOMMENDATION

That the Council Sustainability Committee (CSC) reviews and comments on this report.

SUMMARY

This report provides a summary of the Municipal Regional Permit (MRP) mandate to regulate properties that discharge stormwater directly to the City's storm drain system and the recommended approach to address this mandate, including proposed amendments to the Stormwater Management and Urban Runoff Control ordinance (Chapter 11, Article 5 of the Municipal Code). The current MRP is attached to the City's ordinance and is scheduled to be amended by the San Francisco Regional Water Quality Control in July 2022. Staff plans to begin working with owners of direct discharge properties in early 2022 and then will bring amendments to the City's ordinance for CSC and Council consideration in the fall of 2022 after the new MRP is adopted.
